

PAPER LUMINAIRE - CORNELIA

Instructions

1.
Slide bulb protector on the threaded bulb holder and tighten the plastic disc to keep it in place.

2.
Interlock all four ends from outside to inside to form a cylindrical shape.

3.
The distance protector with bulb is now ready.

4.
Grasp the edge of the inside star and pop it open.

5.
Push up softly to open the branch and repeat with each branch until the flower star is fully opened.

6.
Insert the bulb into the shade and close branches around the cord. Bow tie string around cord keeping the branches close around electric cord.

7.
Close velcro fasteners on last arm of the flower carefully.

Attention

Use maximum 5 Watt light bulb only.
Electric connections should be proper.
Never use the star with or near an open flame.
Keep out of reach of children.
